# INCONTROL

The demands of business often make it necessary that the LAN administrator be in several places at once and always on the spot when an emergency arises. If you have found this to be an impossible task then INCONTROL can help.

INCONTROL is an integrated software/hardware solution that combines:

## Integrated Network Functionality

- \* Down any attached server without affecting your INCONTROL PC
- \* Login, Logout, Attach and Detach servers
- \* Map drives
- \* Send and Broadcast messages

## Power Off and Power On Control

- \* Control **Power Off** and **Power On** to computer and peripheral devices either **Interactively** or through the **Event Scheduler**
- \* Power control interface **attaches to printer port** for easy installation

## Macro Playback Capability

- \* **Automate any program or task** by providing an unlimited number of key strokes to it.
- \* **Playback the contents of a file** through the keyboard

## Integrated Event Scheduler

- \* Unattended execution of all INCONTROL Functions
- \* **Down a Server** or execute an integrated Network function
- \* **Device Power Off and Power On**
- \* **Macro Playback**
- \* Run other DOS programs and batch files
- \* Looks and works like other Network utilities

ARvee Systems developed INCONTROL to meet the demanding needs of our clients. INCONTROL and other ARvee solutions are being used today at some of the largest companies in the world.

ARvee Systems, Inc. is an active participant in the Environmental Protection Agency's Energy Star Program. Electricity consumption by personal computers and peripherals currently accounts for more than 5 percent of our national energy usage and is expected to exceed 10 percent by the turn of the century.
